

Committee: Drug control

Topic: war on drugs

Proposed by: Nigeria

Co-signed: Saudi Arabia, South Africa, Singapore, USA, Australia, Canada, Morocco, Turkey, Mexico, Israel, Belgium, North Korea, Sweden, Finland, Hungary, Spain, Thailand, Austria, Equatorial Guinee, Portugal

The General Assembly,

Alarmed by the fact About 275 million people worldwide (5.6 per cent of the global population aged 15–64 years) used drugs at least once during 2016,

Noting with deep regret that drug abuse rates are high as the government does not implement strong policies towards this issue,

Believing that because of high poverty rates many people don't have access to medical care and pharmaceutical drugs which results in the use of opioids, amphetamines, and stimulants,

Emphasizing the fact that there is a codeine and opioid epidemic that needs to be stopped by any means,

Expressing its appreciation towards the fact that many rehabilitation centers are taking actions and providing a public service to the people,

Bearing in mind that if this issue is not solved it will have huge impacts on the economy since illicit drugs contribute to the underground economy and the miscalculation in GDP,

Welcoming all delegates to sign and support this resolution to aid in decrease of drug abuse rates not only in Nigeria but globally,

1. Calls upon the UN to provide good public health care for the citizens as it will decrease the purchase of opioids and amphetamines
 - a. Within every village/area there will be a medical center fully equipped with medical supplies necessary in order to sustain the area;
2. Authorizes a Tariff on Opioids being imported from Afghanistan in order to
 - a. make opioids more expensive for people therefore decreasing its demand
 - b. allow less Opioids to enter countries;
3. Recommends an implementation of a technological system to be installed
 - a. This system will operate by having an online profile for each citizen
 - b. Each citizen will fill in their personal information and will have a QR code

- c. The QR code will then be used to determine how much quantity the patient needs according to medical databases provided by their doctors
 - d. If the prescription is finished the QR code will stop working until the doctor renews the prescription;
- 4. Encourages the Legalization of Marijuana as it will not only provide a profit for the government and private business but also shall decrease drug abuse
 - a. The THC And CBD levels in the strain is easily controlled especially in third party ingesting systems such as vape pens, edibles, and oils
 - b. Since Marijuana will be legal people will turn to this option as many Opioid users will turn to this drug
 - c. Add a 5% tax on Marijuana products;
- 5. Requests that governments enforce strict policies about the use of drugs
 - a. Anyone who is caught with any sort of drug other than marijuana shall be fined 1000 dollars or more (depending on quantity) and sentenced to 5 years in prison with rehab;
- 6. Further requests the strengthening of rehabilitation centers and offer these centers as a public service;
- 7. Authorizes pharmaceutical companies to produce a cough syrup with an extremely low dosage in codeine or any mild opioid.
